

# Molecular Motors, Tracks & Transport

23rd-28th  
January 2010

PONDICHERRY, INDIA

*This workshop is the third in a series of meetings addressing this field and, as in earlier meetings, will contain a combination of research and instructional talks. These talks are directed at research scientists, graduate students and post-doctoral fellows either working in or interested in working in this area in the near future, as well as physicists and applied mathematicians interested in biophysical modeling. We will select around 35 junior participants by application and cover the costs of participation.*
