# RDO News

## January 2012

# Welcome note

Dear colleague,

We have all had a great start to 2012 with the celebrations for Obaid's birthday and NCBS' anniversary. A time to remind ourselves about the origins of our institution and to consider what the year ahead holds for all of us.

2012 promises some significant changes in the way our funding-related information and submissions are managed. The DBT have recently introduced eProMIS, a new online application system (http://dbtepromis.nic.in or http://dbtepromis.gov.in) for managing proposal submissions and grant administration. In addition, the RDO has also initiated the development of an in-house document management system for internal use on the campus (Page 2).

Activities on the Bangalore Biocluster campus continue to expand and to best support this growth, the RDO has recently recruited two more scientist administrators (Page 3).

With best wishes for 2012,

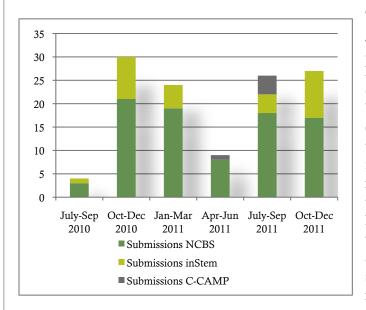

Savita Ayyar

Grant Management System	New starters	Forthcoming deadlines
Page 2	Page 3	Page 4-6

## Document Management System for the RDO

The RDO was initiated in July 2010 and the first set of our activities involved streamlining processes for submitting and tracking grant applications from the Biocluster to Indian agencies such as DBT and DST. As of December 2011, we have now handled submissions to 20 different funding agencies. Commensurate with this increasing diversity of funding sources there has been a rise in the absolute number of applications handled by the RDO at both preliminary and final submission stages (chart for quarterly submission figures).

To keep pace with the increasing amount of grant-related information within the Office and to plan ahead for future submissions, we have initiated the development of an online document management system for the RDO. While this new Grant Management System (GMS) is primarily intended for us to be able to store and retrieve documents related to individual grants, it will also facilitate timely reporting to the Agencies and information tracking for internal purposes. The GMS also has a separate PI interface that will allow PIs to view details of their pending, current, past and withdrawn grants along with reporting schedules as per the specific agency's requirements.

Over the next few months, the RDO will work to implement the GMS in collaboration with grant holders. In this context, new starter Vijayalakshmi Babu may contact you to verify details of your proposals and awarded grants and also to get your feedback on usability of the system from your perspective.

#### Awarded grant

Dr Krushnamegh Kunte, Ramanujan Fellowship, Rs 73 lakhs, 60 months

## New starters

baishalig@ncbs.res.in

#### Baishali Goswami, External Liaison Officer

I completed my undergraduate and post graduate studies in human physiology from the University of Calcutta. To further my knowledge, I moved on to Cambridge, UK to do a PhD on the interaction between trophoblast cells and endothelial cells from the human placenta.

My work at the Bangalore Biocluster will serve to raise the profile of campus research and training activities among the external community and will include contributing to the organisation of visitor events and developing publicity materials.

#### Vijayalakshmi Babu, Grants Adviser (wef 1 February 2012)

After completing my Ph.D at the Indian Institute of Science, Bangalore, India, I first pursued postdoctoral research at the Department of Pathology and Laboratory Medicine, University of British Columbia, Canada. Subsequently I joined the Department of Pharmaceutics and Pharmaceutical Chemistry, University of Utah, USA for further postdoctoral training.

I will be involved in initiating and managing the inStem regulatory office dealing with issues of biosafety, animal ethics and stem cells, aid in implementing the Grant Management System, post-award reporting and other grant – related activities of the RDO.

## Forthcoming deadlines-Group leaders

The following section provides brief details of funding schemes relevant to Group leaders and with deadlines for submission in the period January-May 2012. These details can also be accessed at <u>http://www.ncbs.res.in/rdo/forthcoming-deadlines</u>, where the data will be updated as and when specific deadline information becomes available. Please contact the RDO if you intend to submit a proposal to any of these schemes so that we can plan ahead and assist as required.

#### Post-award grant reporting

As part of the contractual obligations on awarded grants, funding agencies require periodic reports both on scientific progress and on expenditures on grants. The RDO has now started handling dispatch of coordinated scientific and financial progress reports to agencies as per their unique requirements. If you have received any communication from your awarding agency regarding their follow-on reporting requirements, please be in touch with the RDO and we can help coordinate the process.

For any comments, suggestions and queries on this newsletter, please contact Savita Ayyar at <u>ayyars@ncbs.res.in</u>
